Fighting baby, Super 17 and omega Shenron at the same time with SSj4 Gogeta was pretty cool but other than that its only a weak part in the Season pass. Bought game and it's mostly unplayable. Keeps crashing a good 5-10 minutes in. Very laggy and unresponsive. Admittedly my specs aren't top notch, but I should be getting better performance than this. Crashing freezes the whole computer, necessitating pulling the plug to get anywhere. Don't bother. \$10 I won't be getting back.. Greeting mortals! I have just tried this game and played it for 20min-ish and i just love it! The feels you get when you get on the bus, this game is just hilarious. 10/10 fruitloops all the way!  
- Happy supporter. This game was horrible,. This game is so hard. Think of a cross between the iOS game, Temple Run, and Super Hexagon.

Have fun wanting to smash your computer!. This is a cool game, but still too many problems need to fix. I hope the author will fix these issues soon, and I will give this game another chance.

Issues:

1. Awful airplane control and simulation. It's hard to take off an airplane, and also hard to control the direction.
2. Awful performance, after you fire some artillery, the particle effects will kill your brain.
3. Awful camera control, I can not move the center of the camera, so it's hard to build a huge object.
4. Still need more stable blocks, which won't cracked \*easily\*.

. omg that was incredible, I just spent hours starting m dream room and i have so much to do, sitting on my real life bed while at my virtual computer desk was freaking mind blowing, this is the most special game for anyone excited about moving soon or wanting a house or just wanting to redesign. I looooooove the feel of being in my vr room, seriously getting me really excited abut the real life future. Also since I am a gun guy the scar and the safe was sooooooooooooo perfect thank you! I'm even considering buying a scar so really man ty!

Dev, please also put in an FNX 45 or a Glock! Please! and put a vive in the game with controlles! lol

This game is well worth the small price!

<https://www.youtube.com/watch?v=tMZwS6VBI0U>. Contains thicc♥♥♥♥♥♥♥♥. MR X COSPLAY. The game is polished and looks nice, but I don't think it's quite for me. It's super fast-paced and confusing, and I think the game would've been way better on a linear instead of circular pattern, because the motion made my head spin after only a few minutes playing it. If you want a challenge, then I recommend this game to you, but if you want a casual game, and especially if you get motion sick easily, I'd say keep looking.. it's good make more. I want to go ssj4
